Softserve IT Academy

Welcome My First Demo

Hello World!!! :-)

student : Dmitriy Panchenko
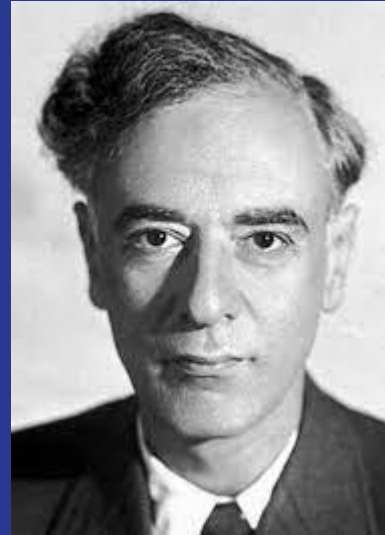

itrihInfo@gmail.com

https://github.com/DitrihInfo/demo1

https://t.me/Ditrih

DevOps стремится сделать сложные вещи простыми, а поэты простые вещи − сложными

Used in this project:
Amazon Web Services - https://aws.amazon.com/
Terraform - https://www.terraform.io/
Jenkins - https://www.jenkins.io/
GitHub - https://www.github.com/

Terraform

aws

Terraform is used to create 2 instances:
JenkinsDemo1 and WebserverDemo1

Instance EC2:

GitHub

SSH

SSH

APACHE

JenkinsDemo1

WebserverDemo1

Build Job and deploy using
Publish over SSH

Commit

The developer makes changes to the web-page and commits. After that he pushes it to
GitHub. Jenkins automatically checks out for changes and tests it. If there's no errors, the
web-page is sent to WebserverDemo1

Do you still have questions?

Thanks!
